

## A Smile That You Will Never Forget

So the photograph caught your eye, what a fish and it will be good!  
What does it take to catch a fish like this and to make someone this happy?  
The right equipment, lots of patience, and something to attract the fish to you.  
Once a fish shows that it's interested, the rest is simply bringing it into the boat.

What is it that makes a young woman jump for joy and fall in love?  
And on their wedding night, she will jump right into her husband's arms,  
Crossing the threshold she reminds herself, her last name has change to his.  
There's a secret only husband's and wives know the answer and it is not for sale.

Hanging out with fishermen, you will eventually discover fish hanging on your line.  
When you get it right, you will want to get home each night to be with your spouse.  
(If you have found faith in God) These days there's plenty of work to be accomplished.  
*And your average time teaching others the gospel will bring...A smile that you will never forget.*
