

Plant A Tree...To Give Life, Growth, and Restore Health

May the Lord who gives us strength and peace, give us a heart willing to forgive and forget. Though we've sinned against Him may God continue to re-establish a relationship with us!!!

The life altering surgery was successful and you get released from the hospital...Plant a tree. The prayer request you have faithfully asked for all these years is within reach...Plant a tree. The job, or career opportunity of your dreams slowly starts to become a reality...Plant a tree. The birth, or death of a loved one occurs and knowing God will take care of us...Plant a tree.

O' the list can go on and on we can rejoice for a marriage, anniversary, graduation, birthday, or a close friend fades away God touches their heart and we start talking again...Plant a tree.

For a tree to come into life, it starts with the seed being planted into the ground. Then with God's help, we gently water the seed or seedling. Sometimes God takes over from there and sometimes we need to continuously nurture or take care of the tree from that point forward.

Start by finding a place with plenty of sunlight. Dig, plant, and water in the right amount. (Then re-visit often to promote growth in what He has richly blessed us with to take care of.)

Everything we can see, smell, touch, or dream of with the mind that He freely chose to give us is without any doubt God's gift to us. We are His! With a spiritual body shaped in the image of God/Jesus/and the Holy Spirit able to bring about a glowing smile in the life of another human being or on the other hand bring forth grief, misery, or destruction...Where do we go from here? The choices God gives us are either to promote life, do nothing, or the opposite of good [evil.] *Plant a tree, help save the earth. Or if you've caused anyone harm, plant a tree and seek forgiveness.*

If these words have inspired you, follow the steps necessary for success. Depending on your needs by yourself, with someone, or a group effort take a seed or seedling to a nearby park, forest, or any place of abundant space where trees are allowed to grow and go do what needs to be done. And please don't forget to go back as needed to water the tree, plus say another prayer giving your concerns, troubles, and/or praise to our Savior.
